

# FOREIGN TRADING SYSTEM

## CLASS DIAGRAM FOR FOREIGN TRADING SYSTEM

```
import java.util.*;

/**
 * Class customer
 */
public class customer {
```

## FOREIGN TRADING SYSTEM

```
//
// Fields
//

public void order_product;
public void quality;

//
// Constructors
//
public customer () { };

//
// Methods
//

//
// Accessor methods
//

/**
 * Set the value of order_product
 * @param newVar the new value of order_product
 */
public void setOrder_product (void newVar) {
    order_product = newVar;
}

/**
 * Get the value of order_product
 * @return the value of order_product
 */
public void getOrder_product () {
    return order_product;
}

/**
 * Set the value of quality
 * @param newVar the new value of quality
 */
public void setQuality (void newVar) {
    quality = newVar;
}

/**
 * Get the value of quality
 * @return the value of quality
 */
```

## FOREIGN TRADING SYSTEM

```
    */
    public void getQuality () {
        return quality;
    }

    //
    // Other methods
    //

    /**
     */
    public void payment()
    {
    }

    /**
     */
    public void delivery()
    {
    }

    /**
     */
    public void transport()
    {
    }
}
```

```
import java.util.*;

/**
 * Class customer
 */
public class customer {

    //
    // Fields
    //

    public void order_product;
    public void quality;
```

## FOREIGN TRADING SYSTEM

```
//  
// Constructors  
//  
public customer () { };  
  
//  
// Methods  
//  
  
//  
// Accessor methods  
//  
  
/**  
 * Set the value of order_product  
 * @param newVar the new value of order_product  
 */  
public void setOrder_product (void newVar) {  
    order_product = newVar;  
}  
  
/**  
 * Get the value of order_product  
 * @return the value of order_product  
 */
